

The World's Lightest Chair

ULTRALEGGERA

1660 grams

We make
history

Oskar Zieta decided to face the featherweight of classic concept by Gio Ponti called Superleggera. Zieta's creation is Ultraleggera - the lightest chair in the world. Ponti's project reached 1700 grams in weight while some prototypes by Oskar Zieta went down to 1660 grams.

**Our ULTRALEGGERA is
a contemporary response to
the light weight challenge
we have received from
Gio Ponti's design icon. -
says Oskar Zięta."**

Simple form

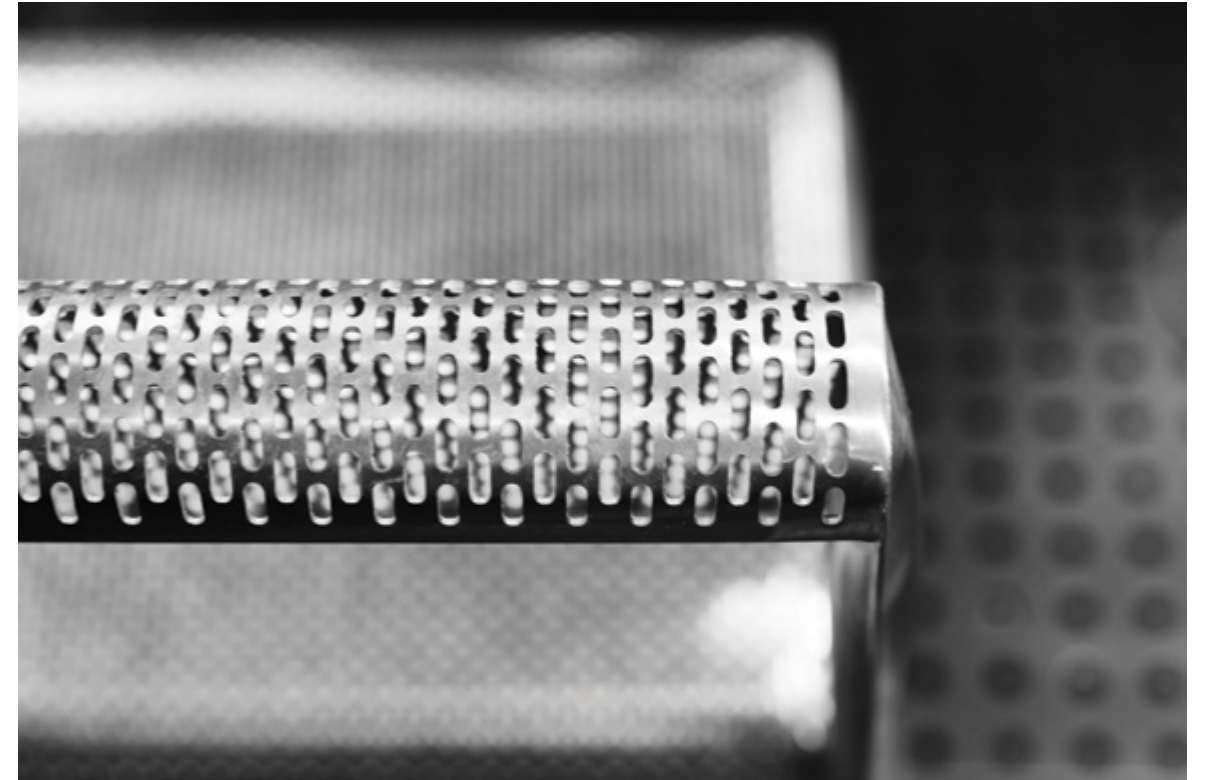

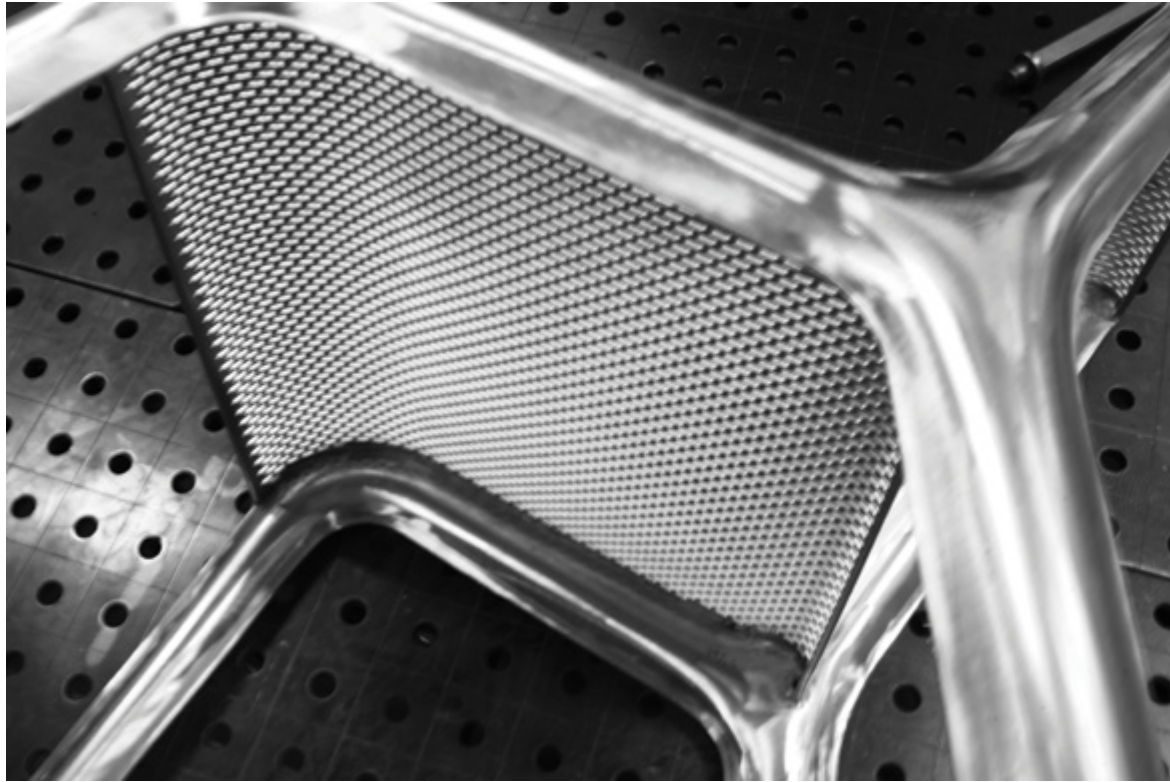

ULTRALEGGERA is a manifesto chair. Its final form and properties, implied by monomateriality, are like a lens concentrating complex issues from the fields of ecology, technology and economics. Stability, durability and simplicity are its main components. The last factor makes it timeless and allows to fit it into every space. Stable construction is a guarantee of long-lasting use. Durability owes to strong welds keeping the elements intact.

Just one material

ULTRALEGGERA design fits perfectly the current trends and consumers' expectations, especially in terms of environment friendly solutions. Pursuant to MMT idea (Mono Material Thinking), the chair is made of just one material - aluminum, what allows to recycle it entirely. Its aluminum frame, seat and back keep together with aluminum welds, just like in a professional bicycle frame. This solution fulfills the criteria of reasonable resources management called Circular Economy. It assumes manufacturing products from materials that can be retrieved and reused.

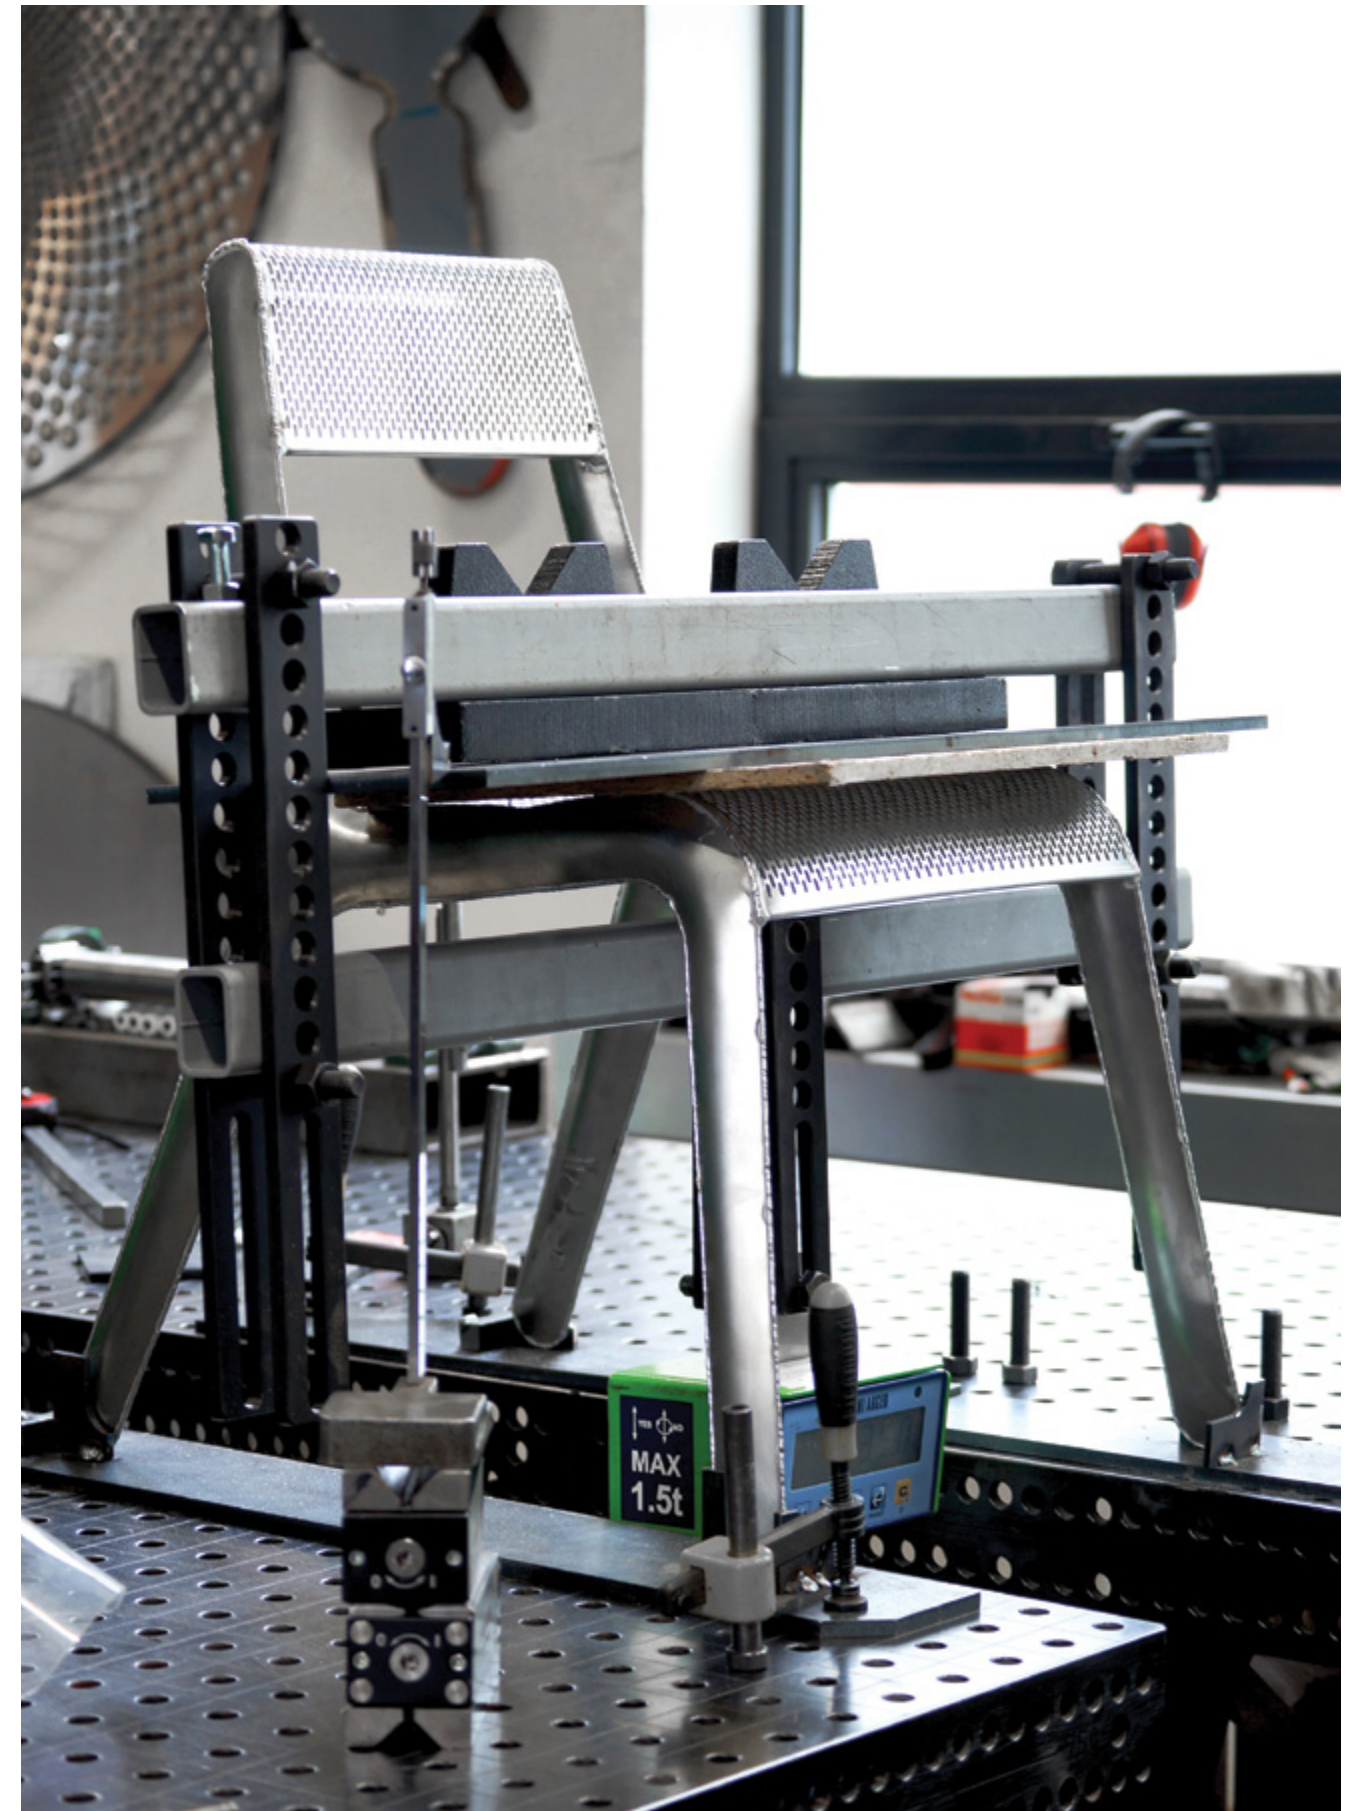

Paradoxical durability

The ULTRALEGGERA chair is a mixture of contradictory properties. Thanks to its nature-inspired form the distribution of force arrows on its surface is uniform. Oskar Zięta proved the strength of the construction and of the material during two tests. First one was performed on a free-standing chair with a load of 500 kg. Then the second one followed: the chair was immobilized and endured a load of the stunning 1208 kg.

The exceptional lightness of the chair is thus compiled with its remarkable durability.
