The agile revolution

The business environment is changing more dynamically than ever, creating a growing need for more flexible workspaces. Offices must be ready to suit different working styles, adapt to the hybrid working model, and adjust to different team sizes and needs or even locations while remaining sustainable. Modular architecture presents a holistic answer to these challenges.

About OmniRoom

OmnirRoom is a modular office system for shaping flexible, construction-free, future-ready offices. OmniRoom uses the patented technological innovations and benefits of modular architecture to offer an infinitely easier and quicker solution for planning and building comfortable, plug & play and reshapable workspaces. From this factbook, you'll learn about its most essential elements.

Click-in assembly system

We believe creating and rearranging an office should take hours or days, not weeks or months. To ensure a quick and seamless assembly and reconfiguration, we pioneered and patented new technology.

The Click-in System allows wall modules to be effortlessly bound and disassembled without tools and any effort. Even constructing large setups becomes a breeze – a team of three people can build one square meter of OmniRoom in just 20 minutes. This simplifies and accelerates the creation and rearrangement of office fit-outs, making it not more complicated than assembling Lego parts.

Furniture and accessories

Arrange ultimate work comfort

To efficiently use every inch of space, OmniRoom system includes a set of wall-mounted, tailor-made furniture.
All elements are designed purposely to fit like a glove to OmniRoom modules size and design and ensure the best possible ergonomics.

The set includes dozens of elements like desks, tables, cabinets, shelves, and much more. All are created in the same style to give your OmniRoom a coherent, stylish look.

Wall-mounted system

Hang every add-on on any height of any wall, inside or out, and rearrange freely – it’s that simple! All thanks to the specially designed hook system.

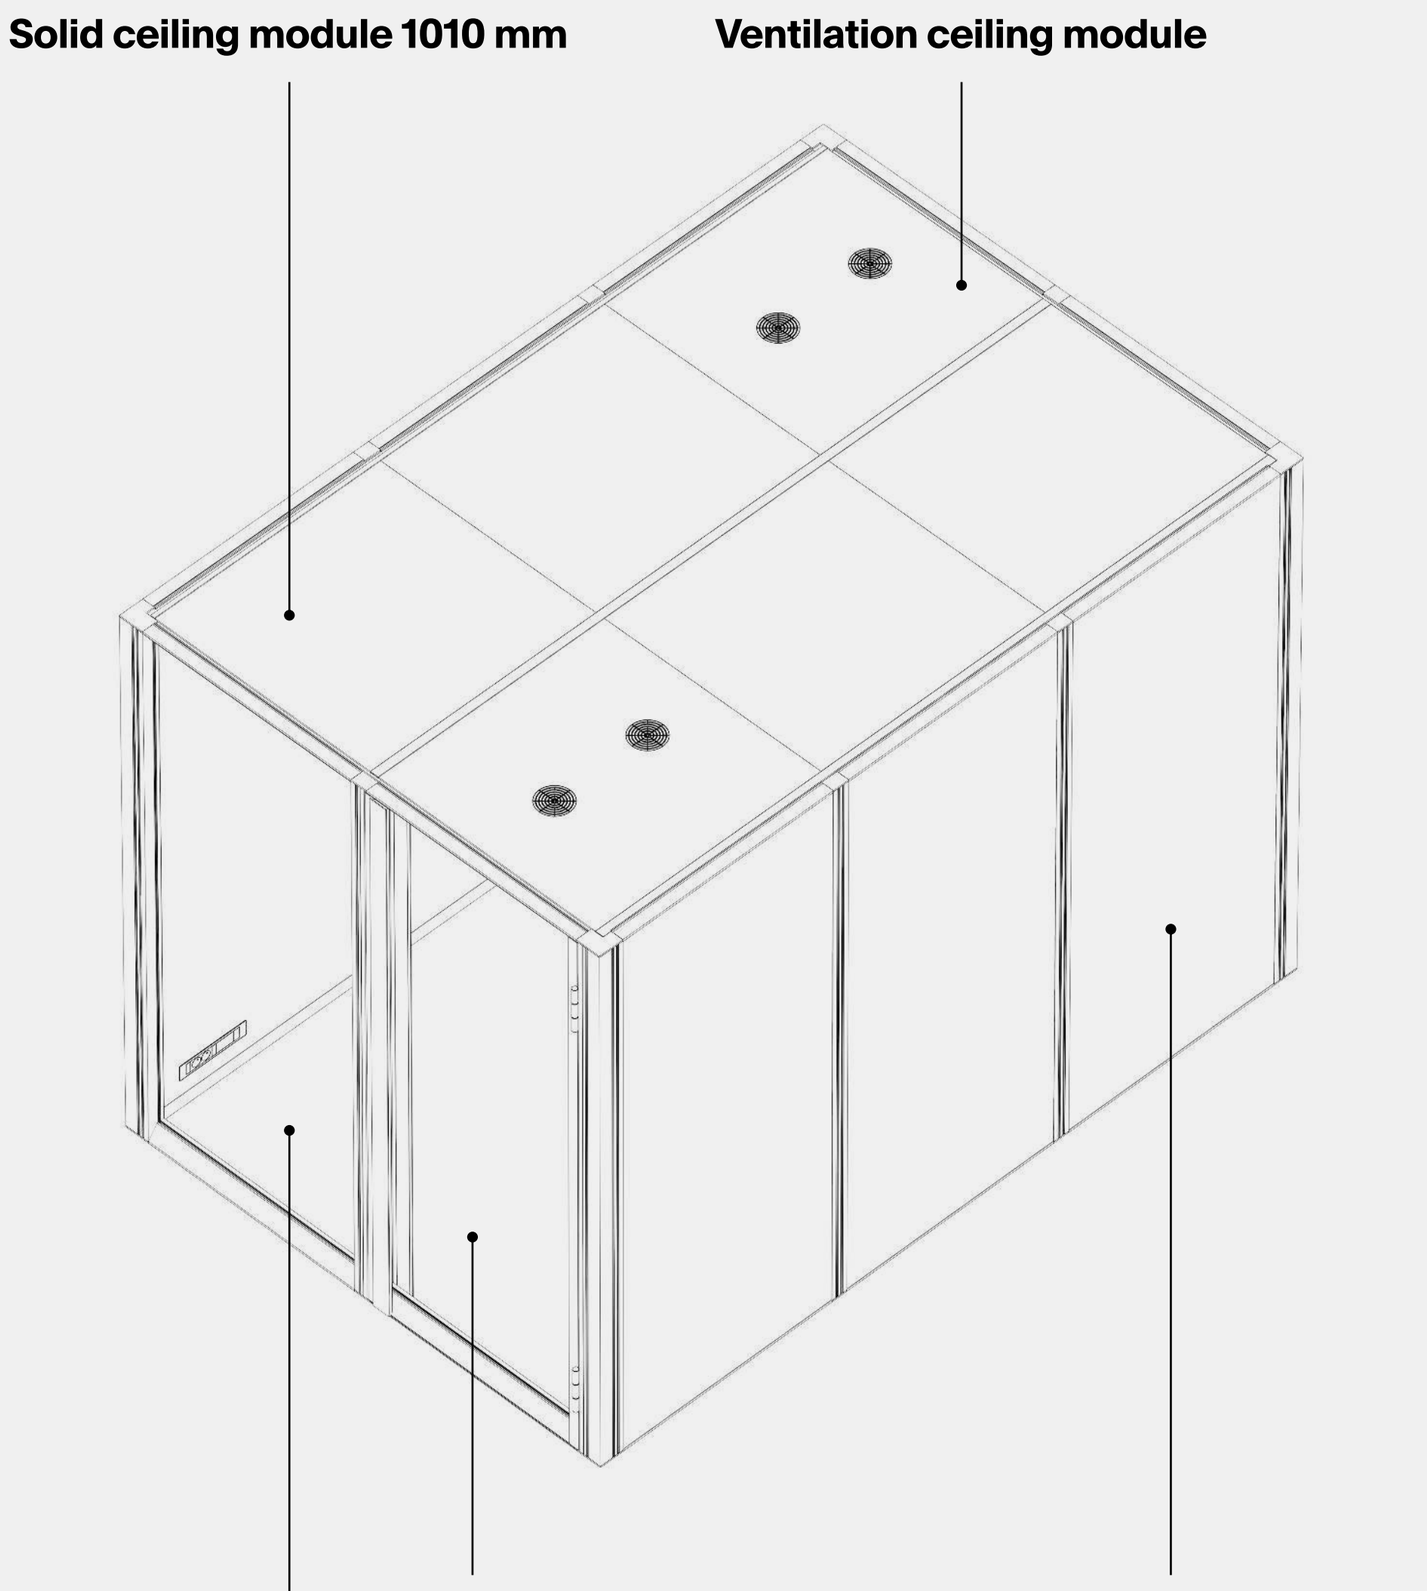
Sample rooms

Construction

OmniRoom system elements provide limitless ways of building closed and semi-closed Rooms of different shapes and sizes. Thanks to Click-in System, assembly takes 30 minutes for each 1m^3 with 3 people.

See all system elements →

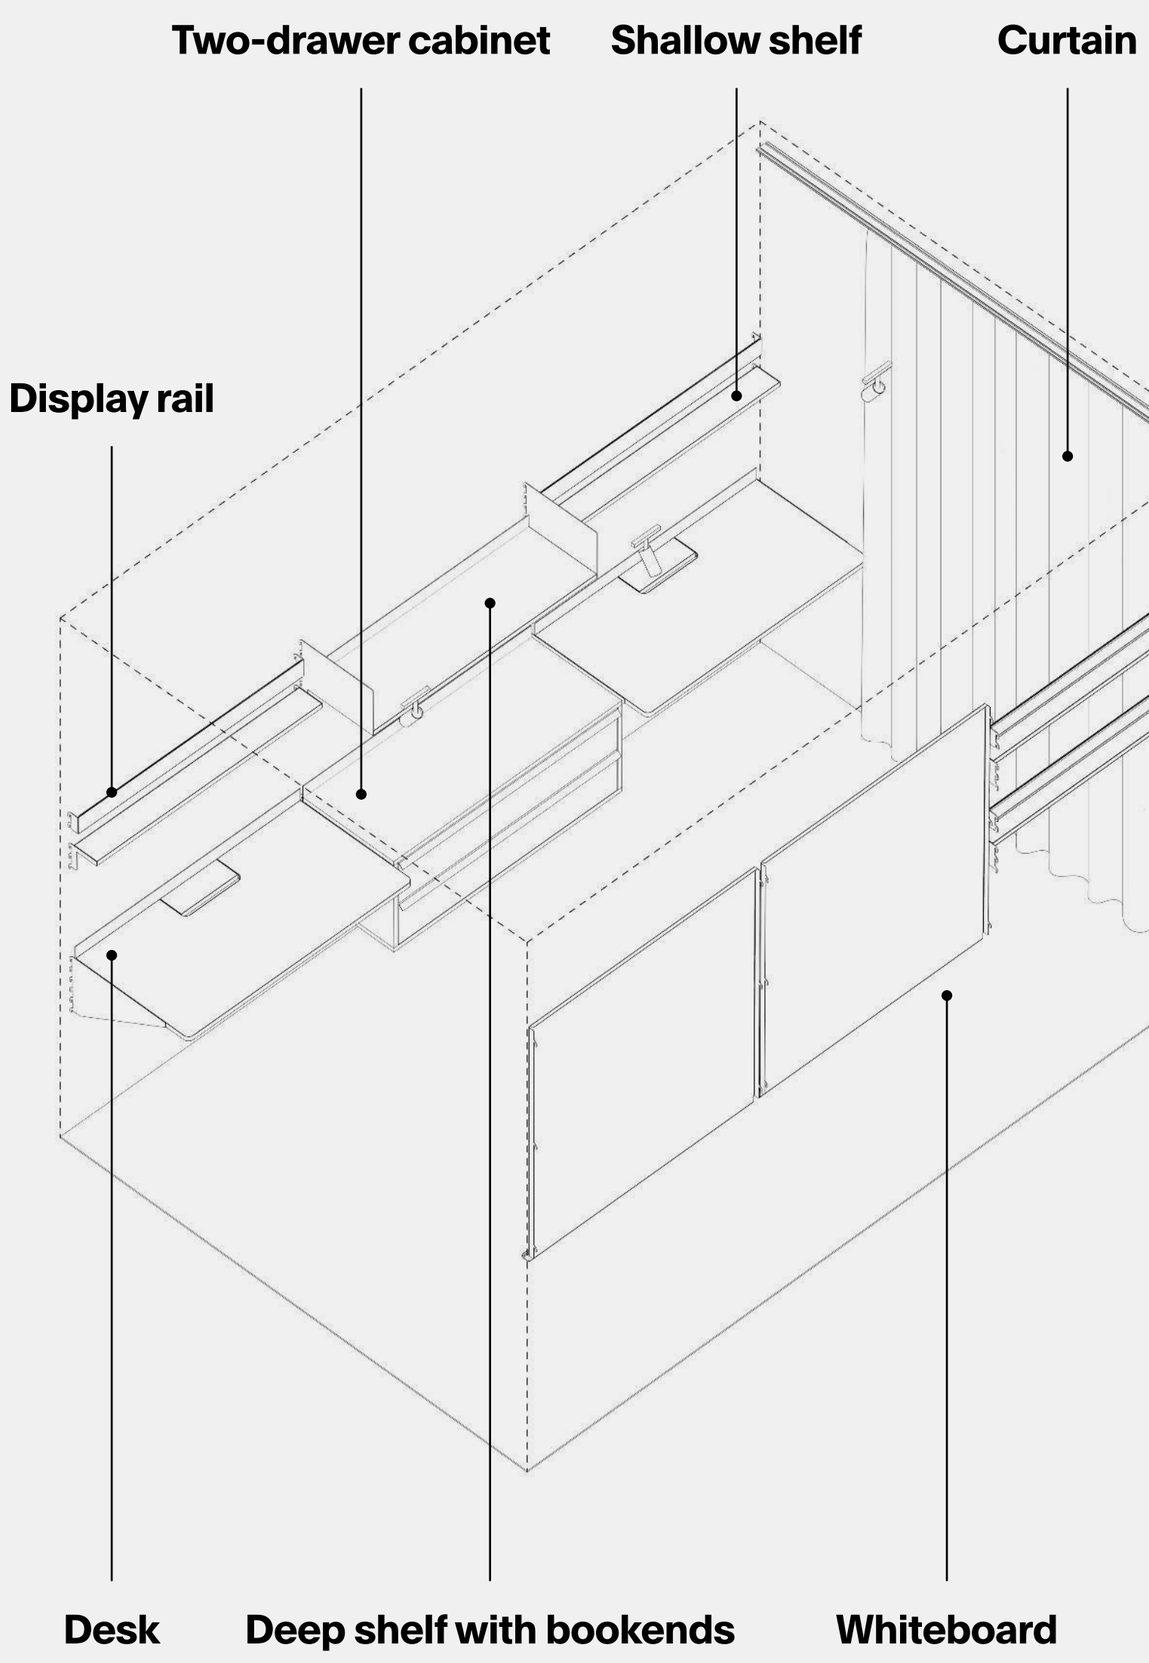


Furniture and accessories

The system's integral element is a dedicated furniture set. All 30 wall-mounted add-ons, including desks, tables, cabinets, shelves, and drawers, can be hung at any height of any wall. Inside or out.

Here is an example showcasing two workstations that have been exclusively designed using the OmniRoom furniture set.

See all furniture and accessories →



Complete room

The modular system of wall modules allows for countless arrangement options. Still, for ease-of-use, we predesigned 100 fully equipped Rooms and configurations, including workstations, meeting places, lounge areas, and many more. They are designed by experienced architects and planners based on actual floorplans.

All Rooms come with recommended furniture and accessories from top producers, ensuring a stylish and cohesive look while maximizing ergonomics.

Finishings and colors

Color selection

Selecting the right colors is essential for maintaining a welcoming atmosphere and accurately reflecting the brand's identity. To achieve this, a team of experienced architects and designers meticulously chose the wide, earth-tones-inspired color palette for OmniRoom.

Every color in the palette comes with a broad range of finishing options, including felt, powder-coated metal, oak laminate, and many more.

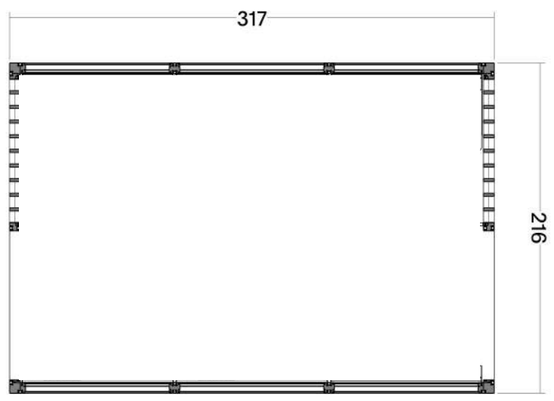
Dimensions, Acoustics and Ventilaton

Dimensions

Width of 1 m wall module	1010 mm / 40 inches
Width of 0.5 m wall module	505 mm / 20 inches doesn't include size of construction profiles
Height (interior / exterior)	2250 / 2400 mm (incl. ventilation) 89 / 94 inches (incl. ventilation) doesn't required room height to place OmniRoom is min 2600 mm / 102 inches include size of construction profiles
Minimum - Maximum size of closed Room	1010 mm x 1515 mm / 40 x 60 inches - 4180 x 5190 mm / 164.57 x 204.33 inches
Minimum - Maximum size of open Room	1010 mm x 1515 mm / 40 x 60 inches - 4180 x 4180 mm / 164.57 x 164.57 inches

Example size of OmniRoom 3x2	L / W / H
Inside	3030 × 2020 × 2250 mm / 119 × 85 × 89 inches
Outside	3170 × 2160 × 2400 mm / 125 × 85 × 94 inches



Acoustics

Solid wall insulation	est. RA1 = 34-44 dB
Glass wall insulation (6-8 mm)	est. RA1= 30-36 dB (ISO 140-4) depends on room layout and wall finishes
Reverberation time inside	0,2 s - 0,5 s per ISO 354:2005 depends on room layout and wall finishes
Est. speech attenuation level	>25 dB, class B per ISO 23351

Internal walls finished with upholstery and ceiling modules are sound-absorbing surfaces in class A (90-100% absorption).

Ventilation

Air flow	1 fan = 182,5 m3/h 1 fan = 107,4 CFM (50,7 l/s) one ceiling module contains 2 fans, number of ceiling modules depends on size of room
Est. min air flow efficiency per 1 pers.	40 m^3/h // 23,5 CFM (6,5 l/s)
Fan emitted noise outside / inside	≤39 dB

Sustainability and certificates

Sustainability: How we make our mark

At Mute we create products built to last. With genuine value for their users and with respect for nature. We are constantly striving to reduce our impact on the environment throughout product creation, from the materials we use to the way we design, implementing environmentally conscious methods and operations.

Effective Management System

Each stage of the production is analyzed in terms of environmental impact, in line with the implemented and certified Environment Management System **according to ISO 14001 standard.**

Certified Production Process

We take sole responsibility for the entire production process with our own manufacturing plant **running in line with ISO 9001.**

Highest Quality Assurance

Our products are made of locally sourced, durable and environmentally friendly materials. External accredited bodies test the majority of our products. Our in-house experts constantly improve all.

Efficient Warehouse Management

Vast majority of our products, including OmniRoom, are made to order. Thus we do not generate an excess of production and minimize the use of the storage space.

A sustainable office system

In today’s fast-paced business world, a flexible office means a sustainable office. OmniRoom’s modularity makes it a perfect, green alternative to rigid, non-moveable traditional plasterboard constructions.

Easy to rearrange or dismantle and reassemble in another place, OmniRoom is far more environmental-friendly on many levels: materials, CO^2 emissions, and amount of waste generated. Additionally, we applied sustainable solutions throughout the production and product lifecycle.

Designed for disassembly

While designing OmniRoom our engineers made sure that all elements are reusable and were created limiting resource consumption in the whole production process.

Construction and components

OmniRoom is made of extruded aluminum - which is considered the most environmentally sustainable building material. Aluminum is lightweight, durable, and fully recyclable.

Finishing

Fabric: Kvadrat Air (Greenguard Gold, EPD)
Wallpapers: Vescom Onari & Millwood (CE and VinylPlus®)
Melamine: Egger Vincenza (FSC, EPD)

Guarantee

Its aluminum frame makes OmniRoom walls significantly lighter than the average acoustic pod. That means a lower environmental footprint in the production process and a reduction of CO^2 during transportation. Plus, OmniRoom doesn’t require any electrical tools for assembly.

Packaging

We deliver OmniRoom in ecological and recyclable cardboard packaging. We optimized the packaging method in detai to minimize the space and resources we use.

Guarantee

We offer a 5-year warranty and a 5-year right to repair.

RoHS

RoHS is a product level compliance based on the European Union's Directive 2002/95/EC, the Restriction of the Use of certain Hazardous Substances in Electrical and Electronic Equipment (RoHS). It means OmniRoom is compliant with this directive and do not exceed the allowable amounts of the restricted materials.

RoHS

CE

CE mean that the Mute affirms the goods' conformity with European health, safety, and environmental protection standards.
